

Worry Free Videoconferencing w/Computer and PTZ Camera

Video conferencing is a staple of the modern conference room. With all the different technologies and vendors who offer videoconferencing, who do you call when there is a problem? *The AV department; IT; cloud service; the circuit provider?*

Do you call team members and associates to figure out what went wrong where and how? *Meanwhile do you have to postpone or cancel critical meetings?*

Let the stress fade away worry free, and your team members uninterrupted. We keep your conference rooms and huddle rooms firing on all cylinders all the time.

Service Includes:

- Circuit monitoring
- Firmware updates for camera
- Software updates for computer
- Security and data back-up
- 24/7 Technical Support
- 3 year hardware warranty
- Meeting support
- On-going application support
- Call configuration support
- Vendor support management

We can help extend your meeting rooms to the conferencing cloud

Hosted videoconferencing service means you can connect your videoconferencing system to anyone with a computer, PC, MAC or mobile device and have a videoconference. Up to 100 remote participants can connect, meaning you can do a seminar from one of your conference rooms complete with computer input annotation and electronic whiteboard. Connecting to a meeting is simple through email; hyperlink and speed dial within the cloud conferencing service.

Whether using a PC or MAC, a variety of camera options are available to accommodate any size conference room or huddle room.
